

The Avery Dennison® ST9500® System enables high volume tagging and ticketing for a variety of applications ranging from retail identification to manufacturing processes. The plastic staples used in this machine provide the same fastening strength as metal staples yet allow an easy removal if required. This system is intended to maximize productivity and reduce the risk of creating holes and snags when attaching tags to fabrics and other materials.

The ST9500® is suitable for many retail applications such as:

- High Volume Tagging of Jeans, Trousers, Tailoring and Infant Wear
- Attaching Header Cards
- Attaching Pocket Flashers, Waistband Tickets and Joker Tags
- Denim Whiskering Processes
- Pair and Packaging Dress Socks

Increased Speed, Efficiency and Flexibility

Easily adapted to a wide range of applications and materials, the ST9500® is designed to be low maintenance, while providing fast, consistent ticketing with fewer work delays. The ability to adjust actuation speeds, change needle spacing and program cycles adds to this machine's versatility.

Tickets Stay Neat and Secure

Tickets stay in place until removed by the consumer, which means fewer returned garments due to damage caused by ticket removal.

Professional Appearance

Header cards, pocket flashers and waistband tickets look more appealing because of the precise and consistent stapling the system provides.

Higher Customer Satisfaction

The Avery Dennison® Plastic Staple® is:

- Easy to remove by hand, with no risk of fabric damage
- Safer than thread bar tacks, without the need for scissors
- Much safer than metal staples due to no sharp edges and reduced chemical interactions
